SUMMARY

Frontend developer building responsive, accessible web applications with React, Next.js, TypeScript, and Tailwind CSS. I translate complex product requirements into clear, usable interfaces, with projects spanning healthcare, job discovery, and community platforms. Comfortable with component-based architecture, REST API integration, and Git-based workflows, and open to frontend work across any domain.

EDUCATION

University of Calabar

Bachelor of Physiotherapy (B.PT)—2020–Present (*Expected graduation: 2026*)

EXPERIENCE

Frontend Developer—Volunteer | HerPhysio Movement—*June, 2025–July, 2026*

- Rebuilt and maintained the organization's public website, including redesigning key pages for responsiveness across mobile and desktop.
- Partnered directly with organizational stakeholders to translate healthcare communication needs into a functional, accessible frontend build.
- Implemented UI components with attention to accessibility, supporting users with a range of technical and health literacy levels.

PROJECTS

PhysioPal | AI-powered physiotherapy guidance and care-workflow application—*July, 2026–August, 2026*

Frontend Developer & Builder • Next.js • TypeScript • React • Tailwind CSS

- Built the frontend using Next.js and TypeScript, developing responsive interfaces and reusable components across the application's core user flows.
- Designed interactive user flows translating a healthcare problem into a structured, easy-to-follow product experience for users with varying technical and health literacy.
- Structured the application with reusable, maintainable components to support ongoing feature development.
- Integrated frontend functionality with API-driven workflows to support the wider product experience.

PhysioTrack | Physiotherapy practice management platform for monitoring patients from assessment to discharge—*July, 2026–August, 2026*

Frontend Developer & Builder • React • JavaScript • Tailwind CSS • Vite

- Built responsive dashboards and patient-management interfaces covering assessment, appointments, progress tracking, and discharge workflows.
- Took ownership of frontend architecture and interface decisions from concept through development, designing reusable components and consistent layouts across the application.
- Translated real-world clinical workflows into structured digital interfaces usable by non-technical healthcare staff.

Job Listing Platform | Responsive job discovery application for browsing and exploring opportunities—*September, 2024–October, 2024*

Frontend Developer • React • JavaScript • Tailwind CSS • Vercel

- Built a responsive interface for browsing job listings, focused on information hierarchy and intuitive navigation across screen sizes.
- Developed reusable components and structured layouts for consistent UI behavior.
- Deployed independently on Vercel, managing the full development-to-deployment workflow.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React, Next.js, Tailwind CSS

Frontend Development: Responsive Design, Component-Based Architecture, Reusable Components, REST API Integration, State Management, Accessibility (WCAG-aware design), UI/UX

Tools: Git, GitHub, Vercel, Netlify, Figma, VS Code

ADDITIONAL

- Experience taking products from concept to working frontend implementation.
- Comfortable learning new technologies and working independently in remote environments.
- Experience with Git and GitHub-based development workflows.
